

Watch Out!

It's Girl Time!

With this kit you can create digital designer watches! Mix and match colors and pieces for lots of different designs. These watches are fun to wear & share with your friends!

IN THIS KIT

- 2 plastic band watches
- 3 watch faces with elastic
- 1 flower watch face
- velcro band
- satin ribbon
- assorted foil stickers
- assorted beads
- instruction sheet

Plastic Band Watches

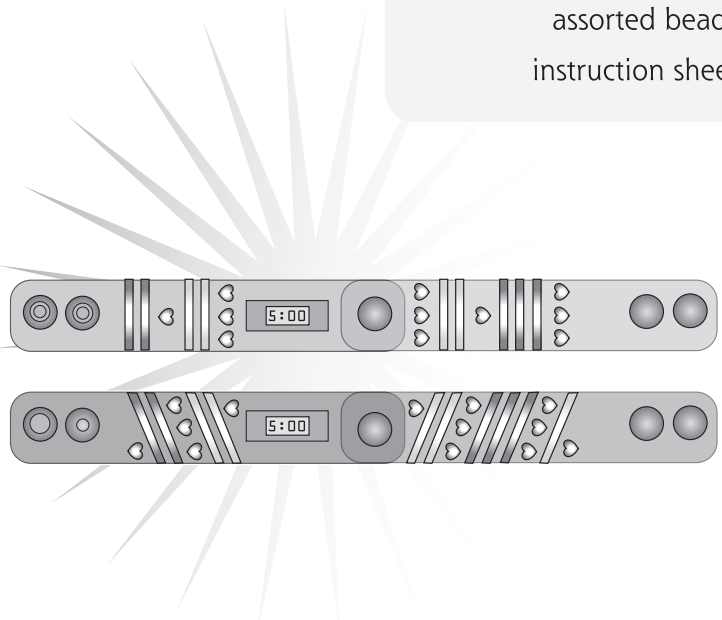

1

Lay out the plastic watches in front of you. Mix and match band pieces on the watches until you find a color combination you like.

2

Create colorful designs using the foil stickers.

Hint: Cut the sticker strips different lengths to create your own unique design.

Elastic Bracelet Watches

1

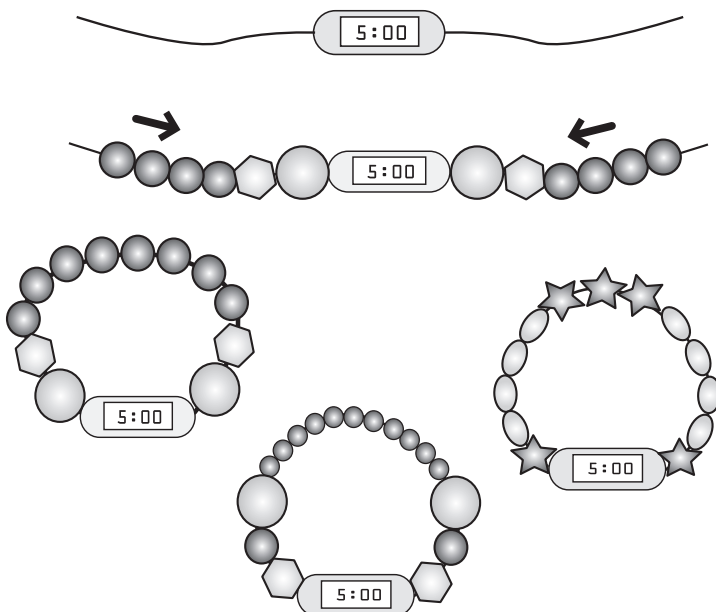

Lay out your watch face with elastic cord in front of you.

2

Arrange the beads how you like them. You can make your bracelet watches as shown on the package or create your own design.

3

String the beads onto the cord on either side of the watch in the order you laid them out. Tie the ends together and cut the cord.

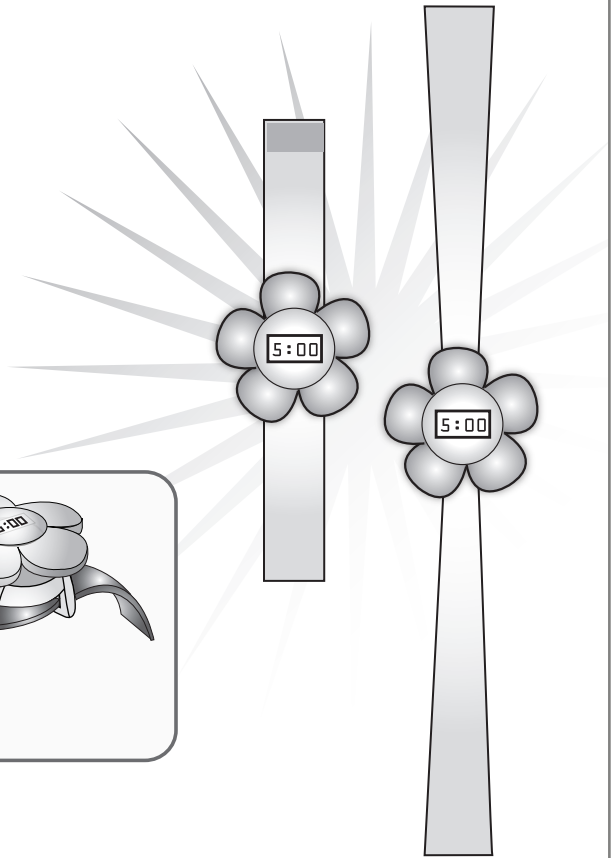

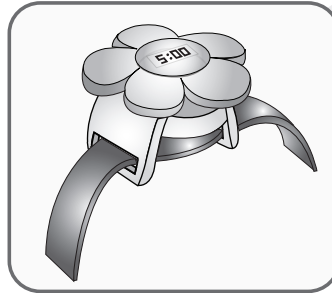

Flower Watch

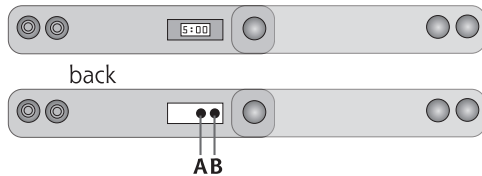

1 Lay out the flower watch face, velcro band and satin ribbon in front of you.

2 Decide whether you want to make your watch a ring or bracelet.

3 To make a ring watch, slide the watch face onto the velcro band and fasten around your finger. To make a bracelet watch, slide the watch face onto the satin ribbon and tie around your wrist.

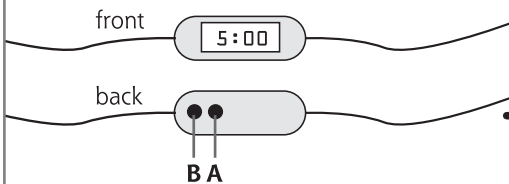

Plastic Band Watches

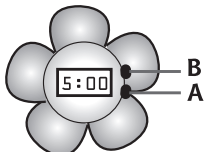

1 To set time & date, press A once.

Elastic Bracelet Watches

2 The **date** must be set first. A number on the left will be blinking, this is the number of the month. Press B to change the number. Once it is set to the correct month, press A. Now a number on the right will be blinking, this is the number of the day. Press B to change the number. Once it is set to the correct day, press A.

Flower Watch

3 Now you must set the **time**. A number will be blinking on the left again, this is the number of the hour. Press B to change the number. Once it is set to the correct hour, press A. Then a number will be blinking on the right, this is the number of the minute. Press B to change the number. Once it is set to the correct minute, press A to finish.

4 To view the date, press B once.
To view the seconds counter, press B twice.

Setting and Viewing the Time & Date
