2 glitter glues

2 adhesive rings

instruction sheet

Design Your Own Flower Push Lights!

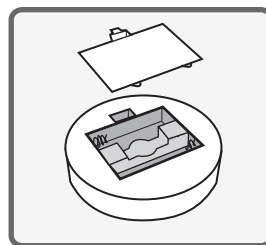

With this kit you can design your own cool room light décor. Illuminate your room with flower push lights that actually light up! The kit makes two flower push lights. Keep them both for yourself or give one to a friend!

To turn on & off your light, just push the globe!

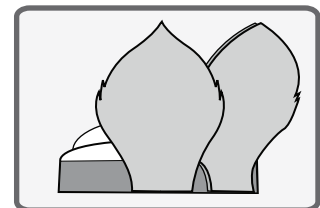

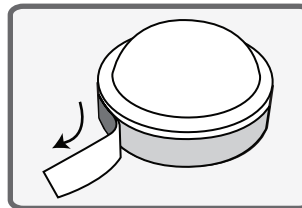

NOTE: To replace the batteries, untie the ribbon & remove the shimmery fabric piece. Then remove the back panel of the push light & discard the old batteries. Insert two new "AA" batteries & replace the back panel.

Making Your Flower Push Light

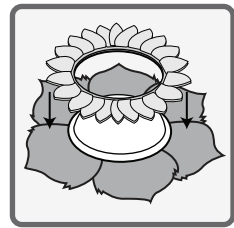

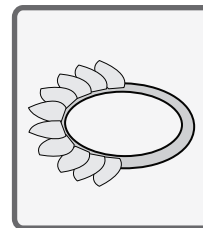

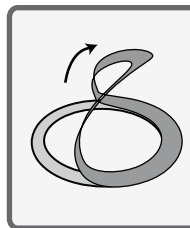

- 1 Remove the back panel of the light & insert two "AA" batteries - not included.

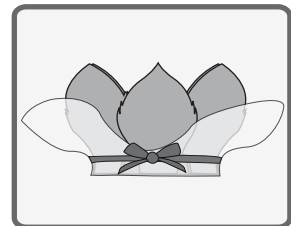

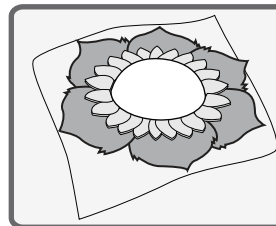

- 2 Remove the backing from the adhesive strip on the side of the push light. Stick 6 of the large flower petals to the adhesive as shown.

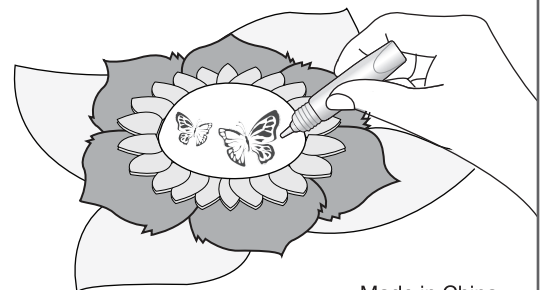

- 3 Remove the backing from one side of the double-sided adhesive ring. Stick 53 of the small flower petals to the adhesive as shown. Remove the backing from the other side of the ring & stick on top edge of the push light.

- 4 Lay out one of your shimmery fabric sheets & sit your push light flower in the middle. Use a ribbon to secure the shimmery fabric piece around the outside of your light to become the leaves of the flower.

- 5 Decorate the globe of your light with the provided stickers. Use the glitter glue to decorate the flower petals & shimmery fabric leaves.

Now you have your own Room Light Décor!
