

# Sweetheart Jewelry

## Create your own keepsakes!

With this kit you can create your own jewelry AND design a jewelry box to store your creations! Put your favorite photo in the picture frame to make it extra special.

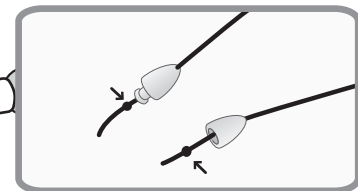

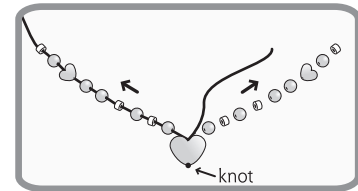

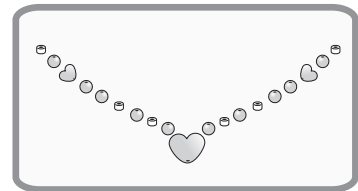

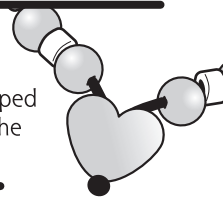

## Making the Jewelry

**1** Decide whether you are going to make the necklace, bracelet or earrings, then lay out the beads the way you like them. You can make them as shown on the package or create your own design.

**2** String the beads onto the elastic cord starting from the center and working outward. To find the center of your cord, hold the open ends of the cord in one hand and pinch the other end. To add the heart pendant, tie a knot in the end of the cord you are pinching (the center). Then thread both ends of your cord through the heart-shaped bead. The rest of your beads can now be threaded through each side of the cord, as shown in the picture.

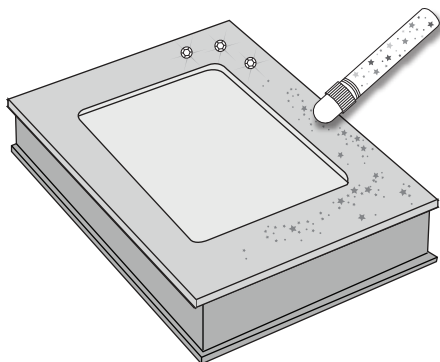

*Hint: Don't cut the cord until you have strung the beads. After stringing, tie the cord, then cut the cord.*

**3** **If making a necklace:** After beading, thread each end of the cord into the two parts of the necklace clasp. Make sure the clasps are facing out so they can be snapped together as pictured. Make a knot in each end to hold the clasps on.

Now you have your own Sweetheart Jewelry!

## Decorating the Jewelry Box

**1**

With jewelry box laying flat, decorate it with glitter glue and gems. Use the glitter glue to apply gems.

*Hint: If you mess up or want to try a different design, the glitter glue can easily be wiped off with a damp cloth before it is dry.*

**2**

Once your jewelry box is dry, place a photo in the frame by sliding it into the slot on top. Now you can store your beautiful creation in the box!

Now you have your own Sweetheart Jewelry Box!

## IN THIS KIT

jewelry box picture frame

1 pair metal earring clips

1 necklace closure

elastic cord

assorted beads

assorted gems

gold glitter glue

instruction sheet
