WARNING:
CHOKING HAZARD - Small parts.
 Not for children under 3 years.

IN THIS KIT

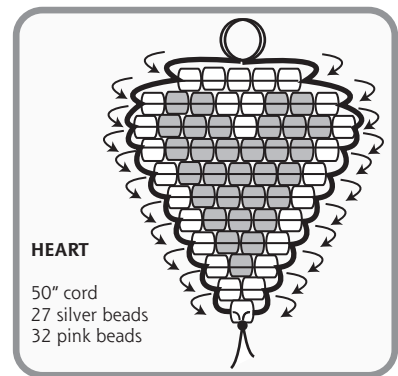

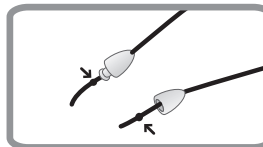

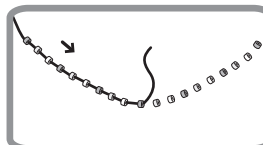

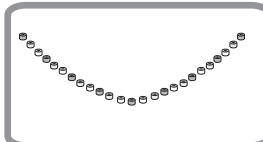

300 metallic beads
 3 key rings
 3 necklace closures
 beading elastic
 beading cord
 instruction sheet

Create shimmering jewelry & fun beaded designs!

With this kit you can create cool metallic jewelry and beaded keychain designs for yourself or to share with friends! Begin by deciding if you are going to make a beaded key chain or piece of jewelry & following the appropriate instructions.

Making Jewelry

- 1** Lay out the beads in a pattern you like.
- 2** String the beads onto beading elastic in the order you laid them out. *Hint: Don't cut the elastic until you have strung all the beads you planned on using in your design.*
- 3** If you make a necklace, thread each end of the elastic into the two parts of a necklace closure. Make sure both pieces are facing out so they can be snapped together. Knot each end to secure the closure pieces on.

Making Beaded Keychains

- 1** Cut a piece of beading cord to the size according to the design you want to make. Find the center of the cord and fold it in half. Take the folded end and loop it around the key ring, pulling the ends. If you are not using a key ring, make a small loop then secure it with a knot.
- 2** Follow the diagram pictured for the design you have chosen. Make sure you follow the directions of the arrows shown in each step. After the last bead, knot both ends of the cord and trim.
