

FUN FOAM FRIENDS

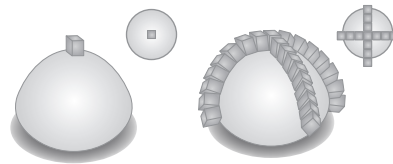

Cat

Have fun with foam. It is as easy as PEEL and STICK. Just follow the directions below and in no time you can have your own Fun Foam Friend.

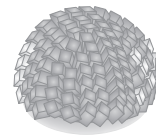

- 1** Layout the plastic body shape, the self-adhesive foam cubes and the foam shapes.

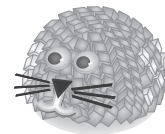

- 2** Find the top and center of the plastic body shape. Peel the backing off a foam cube and place it there. From the center cube place foam cubes in a row from the center cube down to the bottom edge in all four directions forming a cross.

- 3** Using the grey foam cubes, make stripes up the side of the body as shown. Fill in the remaining sections with purple foam cubes beginning from the inner corner of the cross, down to the bottom edge. When this step is completed, the curved surface of the plastic body pieces will be fully covered in foam cubes.

- 4** Peel the adhesive from the wiggly eyes, the nose, the mouth, and the whisker pieces and stick them to the body as shown.

- 5** Peel the adhesive from the small pink ear pieces and stick them to the large purple ear pieces. Be sure to apply the pink piece to the side of the ear that does not have the adhesive strip on it. Then, peel the adhesive strip from the purple ear pieces and insert between rows of cubes. Finally, peel the adhesive from the tail piece and insert between rows of cubes on the back of the body.
